CCTVmap

mapping the surveillance

Concept

- A Map based on OpenStreetMap
- Mapping the surveillance (shop cams, cctv, other stuff)
- People can send POI's (cams) in a formular or via a android app
- There is a alpha map online for some parts of Berlin
- There are some POI's at the Map now (Cams, Police Stations etc)

CCTVmap
mapping the surveillance

The Map

- Map Data from OpenStreetMap
- Domain cctvmap.org is Online

CCTVmap
mapping the surveillance

The Map

The Map

On click: Some Details of the POI (Cam)
(here a Example from Wheelmap.org)

The App

- People take there android device
- Load the cctvmap App and take a Picture from the Cam
- The app save the geo location in the picture tags
- The User make some notice about the cam or poi
- User send the Date to the cctvMap Server
- The Server take the geo location tag an add a new poi
- The notice and the pic from the cam are add to the poi

Call for Help

- What we need:

- People who like the Idea

- For the Map:
  - Somebody who can help us by OpenStreetMap, PHP, Database things

- For the App:
  - Somebody who is fit at Android Development and like the Idea
